The VerifiedHuman™ Problem Model

SOLUTIONS

1. LEGISLATIVE Laws & copyrights

2. TECHNOLOGICAL Encryption & detection

3. VALUES-BASED This is us

SHORTFALLS

LEGISLATIVE

- Copyrights are complex, cumbersome, and ignored
- Laws are slow and ineffective
- Laws don't dictate human behavior—values do.

TECHNOLOGICAL

- Encryption only protects existing content
- AI generates and iterates novel content
- AI detection is not solid, easy to beat
- AI chasing its own tail is like the movie "War Games"

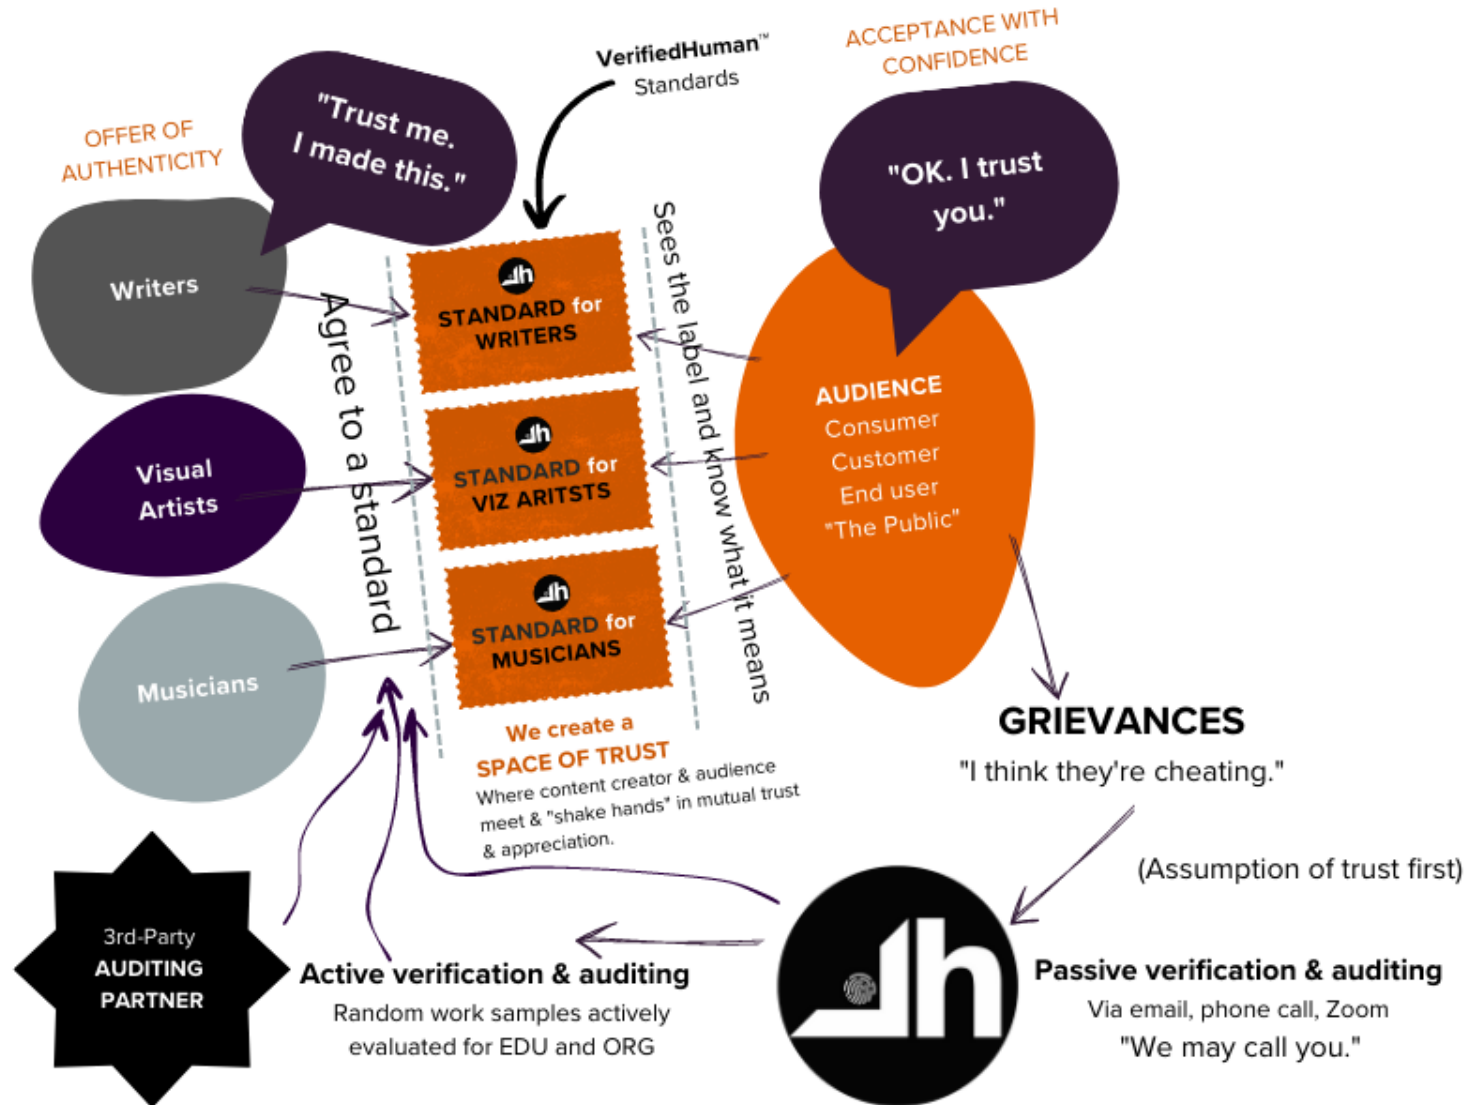

VALUES

- No widely agreed standard
- Diminished societal value
- How to enforce?

The VerifiedHuman™ Primary Model

IN A WORLD WHERE HUMAN VS. AI WORK IS INDISTINGUISHABLE, LAWS, COPYRIGHTS, AND SMARTER AI ARE *NOT* THE SOLUTION.

The solution is uniquely *human*—we have values.

Values *transcend* laws. Values *transcend* technology. We offer values-based standards where creators and audiences can come together in trust.

VerifiedHuman™ is a collective of creatives, thinkers, educators, translators, engineers, writers, visual artists, musicians, craftswomen & men, filmmakers, philosophers, and just about everything in between.

We would love for you to join us.

Introducing the VerifiedHuman™ Standards.

"Hey, world. A human made this, not a machine."

The VerifiedHuman™ Standards promote responsible, honest, and original creation of artistic and academic work.

**None of
this is
surprising
to God.**

**God is the
god of
language.**

- (1) Creation: a speech event**
- (2) Humans: imago dei**
- (3) Christ: logos**

**Are we
capitulating
to culture?**

”Be in, not of”

**No. AI is not a
cultural construct. It
is a super-global
technology.**

**We are all in
it together.**

- **AI is here.**
- **It's going to change everything.**
- **Don't worry.**
- **Lean into the curve.**
- **Learn.**
- **Pray.**
- **Trust God.**
